* Faulkner County, by law, must share some of their sales tax revenues with incorporated municipalities in the county that have not levied as local sales tax.

**Percent change 2017 - 2018

Estimated sales are computed from sales tax collections and adjusted for 2% of tax collections that merchants are allowed to keep for collecting the tax and 3% the state receives for administration.

Sales tax collections do not match monthly municipality receipts exactly because there is a month delay in distributions, and the state receives approximately three percent for administration.
